Response to Amendment

This is in response to an amendment file on November 15th, 2004. In the amendment, claims 1, 3, 5 and 20 have been amended, no claim has been canceled, and claims 18 and 19 have been added. Claims 1-19 remain pending in the letter.

Response to Arguments

1. Applicant's arguments with respect to claims 1-19 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Gallacher et al (U.S. Patent No. 5,661,283).

4. As per claims 1, Gallacher et al teach a method for providing a secure communication network to provide video consultations between a client and a consultant comprising providing to the client via the secure communication network at least one web module, providing to the client a liability limitation module through the at least one web module, wherein a liability

limiting agreement is provided to the client by the liability limitation module, receiving a message from the client via the communication network indicating consent to the agreement and recording the client's assent to the agreement; providing to the client via the communication network a list of consultants from a consultant database module, receiving a message from the client via the communication network indicating a choice of consultants, receiving a message from the choice of consultants consenting to see the client; providing to the client and the choice of consultants a real-time selected video consultation environment within which a conference occurs (*see figs 2, 3, 8 and 10 and the accompany text*) .

5. As per claims 2, Gallacher et al teach a method further comprising issuing a digital certificate to the client after the client has logged on to the communication network (*see figs 2, 3, 8 and 10 and the accompany text*).

6. As per claims 3, Gallacher et al teach a method further comprising authenticating the digital certificate of the client before allowing the client access to the consulting environment (*see figs 2, 3, 8 and 10 and the accompany text*).

7. As per claims 4, Gallacher et al teach a method further comprising calculating a fee based on service rendered within the secure consultation environment (*see figs 2, 3, 8 and 10 and the accompany text*).

Art Unit: 3621

8. As per claims 5, Gallacher et al teach a method further comprising recording an archival copy of the conference recorded by the archive module (*see figs 2, 3, 8 and 10 and the accompany text*).

9. As per claims 6, Gallacher et al teach a method wherein the at least one web page is accessed by a web-enabled device selected from the group consisting of an individual computer, a mobile computer, a personal digital assistant, a hand-held computer, a web-enabled television, a web-enabled interactive kiosks, a web-enabled wireless communications device, a mobile web browsers, or a combination thereof (*see figs 2, 3, 8 and 10 and the accompany text*).

10. As per claims 7, Gallacher et al teach a system for providing a secure communication network to facilitate consultations between a client and a consultant comprising at least one web module configured to provide at least one web page a certificate module configured to provide a digital certificate to the client once the client contacts the at least one web module, a liability limitation module configured to provide a liability limiting agreement to the client via the at least one web module and to record acceptance of the agreement by the client; a payment module configured to calculate a fee for services rendered to the client via the at least one web module, a consultant database module configured to provide a list of consultants to the client, from which the client selects a consultant of choice via the at least one web module; and a consultation module configured to provide a real-time secure video communication environment within which the consultant of choice and the client confer via the at least one web module (*see figs 2, 3, 8 and 10 and the accompany text*).

11. As per claims 8, Gallacher et al teach a system wherein the certificate module issues a digital certificate to the client after the client has logged on to the secure communication network (*see figs 2, 3, 8 and 10 and the accompany text*).

12. As per claims 9, Gallacher et al teach a system further comprising a source module configured to supply code to support the consultation module (*see figs 2, 3, 8 and 10 and the accompany text*).

13. As per claims 10, Gallacher et al teach a system further comprising an archive module configured to preserve a record of the conference between the client and the consultant (*see figs 2, 3, 8 and 10 and the accompany text*).

14. As per claims 11, Gallacher et al teach a system further comprising an electronic white board module configured to provide communication between the client and the consultant (*see figs 2, 3, 8 and 10 and the accompany text*).

15. As per claims 12, Gallacher et al teach a system further comprising an electronic note module configured to provide notes between the client and the consultant (*see figs 2, 3, 8 and 10 and the accompany text*).

Art Unit: 3621

16. As per claims 13, Gallacher et al teach a system comprising an internal communication module configured to provide internal communications between parties (*see figs 2, 3, 8 and 10 and the accompany text*).

17. As per claims 14, Gallacher et al teach a system further comprising a secretarial module configured to provide secretarial services (*see figs 2, 3, 8 and 10 and the accompany text*).

18. As per claims 15, Gallacher et al teach a system further comprising an electronic mail module configured to provide electronic mail services (*see figs 2, 3, 8 and 10 and the accompany text*).

19. As per claims 16, Gallacher et al teach a system further comprising a language translation module configured to provide language translation services (*see figs 2, 3, 8 and 10 and the accompany text*).

20. As per claims 17, Gallacher et al teach a system wherein the at least one web page is accessed by a web-enabled device selected from the group consisting of an individual computer, a mobile computer, a personal digital assistant, a hand-held computer, a web-enabled television, a web-enabled interactive kiosks, a web-enabled wireless communications device, a mobile web browsers, or a combination thereof (*see figs 2, 3, 8 and 10 and the accompany text*).

Art Unit: 3621

21. As per claims 18, Gallacher et al teach a method wherein the client accesses the consultation environment via a virtual private network (*see figs 2, 3, 8 and 10 and the accompany text*).

22. As per claims 19, Gallacher et al teach a method comprising scheduling a time for the client and the consultant to enter the consultation environment (*see figs 2, 3, 8 and 10 and the accompany text*).

Conclusion

23. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. (*see form 892*).
